

**Emergency Telephone Service Committee
Appeals Process for Challenges to
Unallowable Expenditures of Wireless Funds**

The following appeals process for challenges to unallowable expenditures of wireless funds by a county was approved

by the Emergency Telephone Service Committee at its May 22, 2001 meeting:

1. A county or PSAP (primary public safety answering point) with questions or challenges regarding disallowed wireless 9-1-1 expenditures will present a written request of appeal to the ETSC.
2. The ETSC shall, within two (2) weeks of receipt of such a written request, refer the request to the Wireless 9-1-1 Implementation Subcommittee for review and recommendation.
3. A task force of three (3) members of the Wireless 9-1-1 Implementation Subcommittee, one of whom shall be the Subcommittee Chairperson, shall meet and provide written recommendations of resolution of the appeal.
4. This task force shall have thirty days to offer such recommendations to the Chair of the ETSC.
5. The ETSC will then review the recommendations and rule accordingly.
6. The County can then pursue legal recourse if the matter is considered "unresolved."
